

A modern outdoor kitchen island with a woman and a man. The island is made of dark, textured stone with a built-in sink and a grill. A woman in a blue dress stands on the left, and a man in a grey shirt and jeans stands on the right, holding a plate of food. The background shows a modern house with large glass windows and a courtyard with a tree and a living wall.

OUTDOOR KITCHENS

Designed for life outdoors

Modular and standalone solutions for modern outdoor spaces

Q-boo creates outdoor kitchens that transform terraces, patios and gardens into functional living environments. The collection includes both modular kitchen systems and standalone cooking solutions, allowing flexibility across different spaces and lifestyles. Clean architectural forms, premium materials and practical functionality come together to create outdoor areas designed for cooking, gathering and spending more time outside.

Designed with versatility in mind, Q-boo kitchens adapt to different layouts and ways of living. From compact setups to fully equipped outdoor cooking spaces, each configuration supports intuitive use while maintaining a cohesive and refined outdoor aesthetic.

**Cook. Gather.
Stay longer.**

A modular outdoor kitchen transforms the terrace into a place where cooking, dining and social moments naturally connect.

A Complete Outdoor Cooking Experience

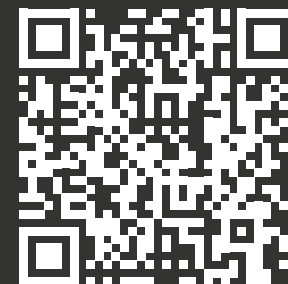

From preparation to serving, every step happens in one cohesive space. Integrated modules create a fully functional outdoor kitchen that supports everyday cooking as well as social occasions. The layout keeps movement intuitive and the workflow uninterrupted.

Outdoor kitchens. Reimagined.

Q-boo creates outdoor kitchens that combine refined design with everyday functionality. Built from modular elements, each configuration can be tailored to the space and the way it is used. The result is a seamless outdoor environment where cooking becomes social, hosting becomes effortless and outdoor living feels complete.

Designed Around the Way You Entertain

The layout supports both casual evenings and larger gatherings. With dedicated space for preparation, cooking and serving, hosting becomes effortless. Everything is organized in a way that keeps the focus on the moment.

The OVO collection

Compact outdoor kitchens. Complete by design.

The OVO collection introduces freestanding outdoor kitchens designed for simplicity and immediate functionality. Each model is created as a self-contained unit that brings together cooking, preparation space and storage in one cohesive design. The compact footprint and balanced proportions make OVO kitchens easy to position, allowing them to fit naturally into a wide range of outdoor spaces.

Three Sizes, One Cohesive Design

The OVO collection includes three configurations — GL, GM and GS — each tailored to different space requirements. From compact layouts to more spacious setups, every version maintains the same design language while offering varying levels of workspace and functionality. This allows the kitchen to adapt naturally to terraces, patios and garden settings.

Designed as ready-to-use solutions, OVO kitchens simplify the planning process. The freestanding format makes positioning straightforward, while the integrated layout keeps cooking, preparation and storage within one organized unit.

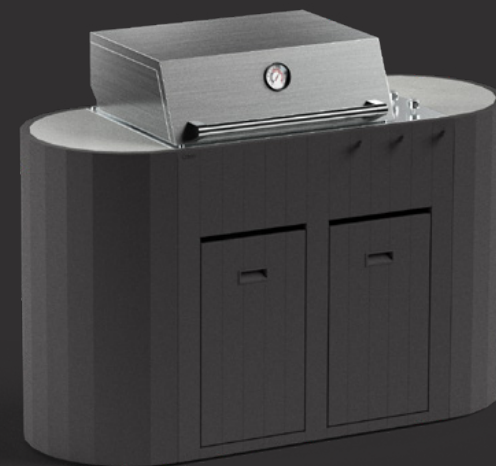

OVO GS

Compact freestanding outdoor kitchen

OVO GS is the most compact model in the collection, designed for smaller outdoor spaces. Despite its reduced footprint, it provides a complete cooking setup with integrated worktop and storage. The freestanding form allows easy placement, making it a practical solution for terraces, patios and more limited layouts.

OVO GM

Balanced freestanding outdoor kitchen

OVO GM offers a well-balanced configuration between compact dimensions and increased workspace. The extended worktop provides more room for food preparation and serving, while integrated storage keeps accessories organized and within reach. Designed as a freestanding unit, it can be easily positioned across different outdoor layouts, creating a complete and functional outdoor kitchen without complex planning.

OVO GL

Maximum space for outdoor cooking

OVO GL is the most spacious model in the collection, offering an extended worktop and increased storage capacity for a more comfortable cooking experience. The larger layout provides additional room for preparation and serving, making it well suited for outdoor hosting. Designed as a freestanding unit, it creates a complete outdoor kitchen in one cohesive and easy-to-place form.
